

High summer electric bills are as predictable as **bad potato salad at a family reunion.**

As summer heats up, so do your energy costs. Keeping your thermostat at a comfortable level creates high summer electric bills.
Take control of your energy costs with solar!

**Invest in a solar array on or before August 29, 2025
and we'll pay your summer electric bills from
June, July and August.* **Solar is more affordable
than you might think!****

Eagle Point  **SOLAR**
Bringing you the **SUN®**

*Rebate check will be issued for electric bill totals during the months of June, July and August of 2024 (previous year) and are made in the form of a one-time payment directly to new solar client upon permission to operate (PTO) and paid in full. **Promotional rebate offer applies to new solar contracts signed and downpayment received between May 27, 2025 – August 29, 2025.** Not valid with any other offers, group buy programs or discounts. Does not apply to solar array additions, generators or battery storage solutions. Some restrictions may apply. Contact a Solar Energy Consultant for full details.
